

EXPERIENCES

LightWebGroup, Nepal - Project Manager [JAN 2021 – JAN 2022]

- Led a team of developers and designers in the maintenance and development of four systems.
- Collaborated with clients and stakeholders to define project requirements, scope, timelines, and budget, ensuring alignment on project goals and expectations.
- Empowered and motivated team members through open communication and resource allocation, successfully managing project risk and issues.
- Completed all projects on time and within budget, resulting in 80 percent increase in revenue of the company using significant cost savings methodologies through optimized processes and waste reduction.

LightWebGroup, Nepal - Software Engineer [JAN 2020 – JAN 2021]

- Contributed to the development of a highly scalable, reliable, and reusable REST API built with a SaaS architecture in mind and utilizing DevOps practices, using Golang programming language.
- Involved in the entire software development lifecycle, from having requirements from the client and analysis, designing and implementing, to testing documenting, reviewing, deploying, setting up CI/CD pipelines and releasing code.
- Upgrading, fixing bugs, optimizing database queries, and page load speed optimization of different reselling applications like E-Commerce, Customer Management Systems(CMS), and Point of Sell Systems(POS) according to the client's requirements.
- Utilized Docker, GitHub Actions and Jira to deliver projects on time and within the budget.

T. For Tech, Nepal - Software Developer [JAN 2019 – DEC 2019]

- Collaborated with the National Organization(Nepal Dana Udhayog Sangh) to design and develop a dynamic website.
- Implemented a content management system (CMS) to allow organization members to easily update website content, and incorporated search engine optimization(SEO) best practices.
- Throughout the project, conducted user acceptance testing and provided training and support to ensure the website met the organization's needs and requirements.

PROJECTS

Brocade, Textile Industry Management System [SEP 2021 – JAN 2022]

- Developed RESTful webservices to record data for Manufacturing, Production, Account and Human Resource departments of the textile industry.
- Used Golang for backend API, PostgreSQL as database, Swagger for API documentation, and deployed dockerised containers on AWS as microservices. [[GitHub](#)]

JobsTrobustech, Job Portal [APR 2021 - DEC 2021]

- Developed a RESTful API for a job portal application that allowed employers to create profiles and allowed them to search and filter candidate profiles based on specific criteria, such as job experience, education, and location.
- Implemented features that will help employers to go through different hiring stages.
- Designed and developed a feature that allowed job seekers to create profiles, resumes and share their profiles with different employers.
- Used PHP(LARAVEL) for backend API, MYSQL as database and automate the deployment service using GitHub Actions and Azure Web App. [[GitHub](#)]

Gokyo Peak Travels & Tours, CMS [OCT 2020 - SEP 2021]

- Designed and developed a website for a tours and travel company with features such as adding trip details, trip planning, booking and integrated payment system such as PAYPAL.
- Used Python(Django) for backend API, PostgreSQL, with a responsive front-end using HTML, CSS, and JavaScript, and deployed the website on a cloud hosting platform. [[GitHub](#)]

Nepal Dana Udhayog Sangh, CMS [FEB 2019 - AUG 2019]

- Designed and developed a dynamic website for a national organization that effectively shared the organization's details, including aims, objectives, events and members information.
- Used Python(Django) for backend, PostgreSQL as database and deployed on Google Cloud Platform. [[GitHub](#)]

SKILLS

Technical

Python, GO, PHP, C#, .NET, Java, SQL, JavaScript, React JS, HTML, CSS, Docker Kubernetes, Git, Cloud Computing, AWS, Azure Active Directory, GCP, UML Diagrams, Agile Methodologies(Scrum), REST API, Microservices, SaaS.

Others Skills

Quantitative and Qualitative Research, Critical and Strategic Analysis, Risk Analysis, Security and Assurance, and Requirement Engineering.

EDUCATION

University of West London, London, UK. **Master of Science in Software Engineering** [JUN 2021 - NOV 2023]

Dissertation:

- Courses: Mobile Web Component Development, Advanced Topics in Software Engineering, Machine Learning, Big Data Analytics, Security Operations and Assurance.

The University of Northampton, Northampton, UK. **Bachelor of Science(Honours) in Computing(Software Engineering)** with Second Class Upper Division. [Aug 2015 - July 2018]

Dissertation:

- Developed a Convolutional Neural Network(CNN) model to solve the 9*9 Sudoku puzzle.
- Collected and analysed dataset of 1 million Sudoku puzzles and their solutions data using Python, Jupyter Notebook, and pandas to train the neural network.
- Trained the model to the accuracy of 96% and was submitted to the university as part of the dissertation.
